

Now you can safeguard your screen, protect your privacy—or both.

## 3M™ LCD Filters.

Innovative protection from a name you trust.

### Protect your investment

LCD monitors. They're high tech. State of the art. The latest thing. They're also expensive and can easily be damaged. That's why 3M has developed a way to help you protect them: 3M LCD Filters. They're an innovative, practical solution that will keep your investment safe.

### Protect your information

Laptop computers offer unprecedented flexibility to working on the road. However, they also expose valuable information to prying eyes—information that could, if leaked, prove costly to your company. Likewise, desktop computers often display documents not meant for wandering eyes.

You need a way to help keep information confidential. 3M Privacy Filters, specially designed for LCD monitors and laptops, let you work with the assurance that your information is secure.

## Laptop/LCD Privacy

**Models PF13.3, PF14.1, PF15.0,  
PF17.0 & PF18.1**

The 3M Laptop/LCD Privacy Filter offers worry-free privacy for Laptop computer users by protecting confidential documents from prying eyes.

- Privacy protection—3M's patented microlover technology works like tiny vertical blinds to block ambient light and narrow the viewing angle so only persons directly in front of the monitor see on-screen data. From the side, others see a dark, blank screen
- Attaches and detaches easily—can remain in place even when laptop is closed
- Available in sizes to fit most laptop screens
- Helps prevent scratches or damage to LCD screens
- Lifetime warranty

*From the side, others see a dark, blank screen.*

## Desktop

All desktop models help prevent scratches or damage to the display and are warranted for life.

### Model AF150LCD (Contour)

- Optimal tint glass for enhanced contrast and more accurate colour representation—excellent for viewing colour graphics
- Easy clean surface
- Reduces static charge and dust buildup when properly grounded

### Model PF450LCD (Contour)

Offers all the features of the AF150LCD, plus:

- Privacy protection with patented 3M microlover technology
- Up to 99.9% reduction of ELF/VLF E-field radiation when properly grounded

**Models PF13.3, PF14.1, PF15.0,  
PF17.0 & PF18.1**

- Privacy protection with patented 3M microlover technology
- Frameless filters, held in place with removable clips, attach and detach easily
