INTRODUCTION.

The coronavirus continues to spread. Day-care centres and schools have already been closed in whole Europe. Covid-19 has been declared by the World Health Organization (WHO) as a pandemic. Unfortunately an end is not yet in sight. More and more people are forced to work from home. Children have to stay at home, supervised by their family.

As many adults - and children too - are afraid of becoming infected by Covid-19, it is obviously extremely important to talk with them about proper prevention. Regular and correct handwashing is crucial. Many infectious diseases are transmitted via the hands.

ONE OF THE BEST WEAPONS PROTECTING YOURSELF OF GETTING INFECTED ARE, ACCORDING TO THE WORLD HEALTH ORGANIZATION (WHO), WATER AND SOAP. REGULAR AND CORRECT HANDWASHING IS THEREFORE A CRUCIAL PROTECTION MEASURE.

But how do I explain to my children the importance of this hygienic measure?

To make this easy for children, new creative ideas are needed, which help parents to motivate and protect the youngest among us in a playful way.

protect

KIDS STAMP

In the morning right after getting up it's time to punch the stamp.

The Corona monster motif is stamped on the back and palm of each hand, let dry for about 10 seconds and then wash your hands several times a day with soap and water.

The virus monster must have disappeared before going to sleep.

STAMP

WASH

PROTECT

All this can be so simple! Be a little hero and protect yourself and your friends from many infectious diseases. Washing your hands is essential and you can now learn this in an easy and playful way.

Stamp the monster on your hands, let dry about 10 seconds and then wash it off.

Grab your favourite soap, turn on the water and ... here we go! **Because, remember, according to the World Health Organization (WHO) water and soap are one of the best weapons to protect yourself.** Repeat the same procedure in the afternoon, the evening.

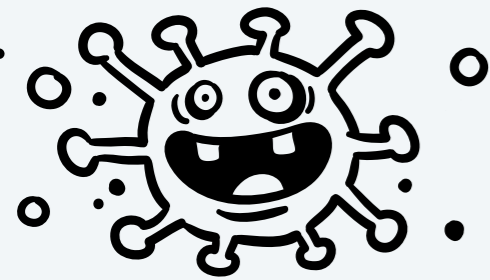

HOW IT WORKS

THE PRO-DUCT

The Protect stamp is produced from our parent company COLOP in Austria, is therefore a true European and stands for premium quality. Efficient logistics, first class raw materials and modern production processes guarantee product quality.

MADE IN AUSTRIA

THIS MONSTER VIRUS MUST BE DEFEATED. WATER AND SOAP WILL HELP YOU TO SUCCEED.

THE PACKAGING

Transparent theft-proof blister with plenty of space for communication and Euro perforation.

DIMENSIONS:

Length: 190 mm
Width: 75 mm

WEIGHT: 120 GR

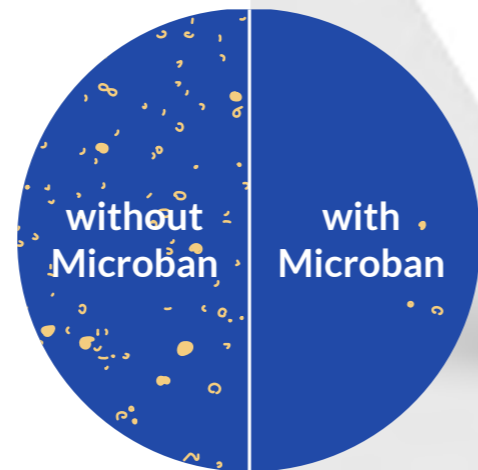

PU: 25 PCS.

PROTECT KIDS STAMP WITH MICROBAN® ANTI-BACTERIAL PROTECTION

Microban antibacterial protection gives the Protect Kids Stamp an extra layer of protection against harmful microbes. Incorporated directly during production, the Microban® antibacterial protection prevents the growth of harmful bacteria. Note. MICROBAN does not protect you from the Corona Virus, as is antibacterial.

THE HARMLESS STAMPING INK

Our Protect stamp is equipped with a dermatologically certified stamping ink. This means that we use stamping ink which is harmless for the skin. Each stamp pad lasts for approx. 3,000 prints or 5-6 prints daily x 500 days.
