

acid toilet descaler

INFORMATION SHEET

8760/00

Pack size: 10x1L

USE:

Maxima Toilet Descaler contains strong mineral acids which will remove limescale and staining from ceramic surfaces. It contains biodegradable surfactants for effective penetration and a rust inhibitor for maximum protection.

Maxima Toilet Descaler is a viscous liquid and will cling to inclined and vertical surfaces.

DIRECTIONS:

To clean ceramic WC bowls and urinals, squirt a small quantity of Maxima Toilet Descaler along the top of the area to be cleaned. The liquid will run down over the surface, covering it completely. After a few minutes, brush vigorously and rinse with water.

Do not use Acid Toilet Descaler for cleaning acid sensitive surfaces such as enamel, chrome, stainless steel, marble, terrazzo, stone, linoleum, plastic floors etc.

All equipment used should be resistant to acid.

TECHNICAL:

Physical state:	Liquid
Colour:	Blue
Odour:	Parma violets
pH:	< 2
Density:	1.02 – 1.04
Viscosity, dynamic:	> 800 cP
