Item Number	Model Name	Binding System	Binding Capacity	Combined Thickness	Warm-Up Time	Variable Heat Cycle	Multiple Binding
5641001	Helios 30	Thermal	300	30	3mins	Yes	Yes

Fellowes

FELLOWES® Helios 30

Unique Features

Safety barrier prevents user contact with the heating plate. The barrier is opened manually and closes automatically

Automatically shuts down during periods of inactivity to reduce energy consumption

HOW DOES THE HELIOS 30 WORK...

- 1 The document scale enables users to measure the documents thickness and calculate the optimum binding cycle.
- 2 The binding clamp slides open, enabling the documents to be loaded into the binder. The documents should touch the heater plate with the clamp supporting the documents during the binding cycle.
- 3 The binding clamp includes the HeatShield feature, a safety barrier to prevent users touching the heated plate during the binding cycle.
- 4 The user can see the progress of the binding cycle and is alerted when the cycle is complete.
