

## USB to Dual HDMI Adapter - 4K

Product ID: USB32HD2

This USB to HDMI® Dual Monitor adapter lets you add two independent HDMI displays to your computer using a single USB 3.0 port. One of the HDMI ports can output resolutions up to 4K, while the other can output resolutions up to 1920 x 1200.

### **Increases your productivity by providing multiple displays**

Adding more displays to your workstation can be difficult, especially if your computer does not support MST or offer many external video ports. This USB to dual HDMI adapter features two video outputs, boosting your productivity by giving you more screen space to work from. With multiple displays you have the freedom to access multiple applications at the same time and reference material on one display while you compose on the other.

## **Maximizes your screen real estate with resolutions up to 4K**

One of the ports on this USB video adapter supports resolutions up to 4K at 30Hz, meaning you can connect a 4K monitor, HDTV, or projector to your computer, even if your laptop or desktop video card doesn't natively support 4K output. The USB to HDMI 4K adapter lets you extend or mirror your primary display onto an Ultra HD monitor or television, giving you the additional screen space you need to simplify multitasking and maximize your productivity.

## **Perfect for all of your business applications with USB 3.0 performance**

Using the high-bandwidth USB 3.0 interface, this USB 3.0 to HDMI adapter enables smoother scrolling through documents, higher resolutions and better overall performance than earlier USB adapters. This video adapter is intended to support all of your business applications including web browsing, e-mail, spreadsheets and presentations. You can also leave your system video card available for more demanding applications such as gaming or CAD design, while you use the USB monitors for reference material.

The USB32HD2 is backed by a StarTech.com 2-year warranty and free lifetime technical support.

### Certifications, Reports and Compatibility

### Applications

- Add two displays to your workstation
- Run multiple applications on different screens
- Mirror your primary display onto a UHD monitor or television

### Features

- Increase your productivity by connecting two independent displays through a single USB 3.0 port
- Add astonishing picture quality to your computer by adding support for resolutions up to 4K
- Get exceptional USB video performance to support your standard business applications
- USB powered - no additional power supply
- 2-channel (stereo) audio support

<b>Hardware</b>	Warranty	2 Years
	Audio	Yes
	AV Input	USB 3.0
	AV Output	HDMI
	Chipset ID	Trigger T6-688SL Silicon Image - SiI9136-3
	Memory	64MB DDRII SDRAM
	Ports	2
	USB Pass-Through	No
<b>Performance</b>	Audio Specifications	2-channel stereo
	Maximum Digital Resolutions	4K x 2K @ 30Hz
