- **Ultimate:** UHD + MEMC + HDR

### Sound Master

- **Standard:** DTS speaker technology
- **Plus:** DTS + speaker box
- **Pro:** DTS + speaker box + sub woofer
- **Ultimate:** tbc

dual upscale

### Dual Upscale

Converts low resolution material into a higher definition by upscaling content to utilize the TV's maximum resolution. With Hitachi's technology SD content is edited and re-rendered twice to improve the resolution, with less distractions and sharper pictures.

USB playback

### USB Playback

Offers the flexibility of watching and listening to content by simply connecting a USB thumb drive to the USB port and accessing the files via the TV's media centre menu.

smarTVue remote

### Hitachi smarTVue remote

This IOS and Android app enables a mobile device touch screen and motion sensors to act as an alternative and convenient way to control the Hitachi smart TV.

smarTVue share

### Hitachi smarTVue share

Allows easy viewing of data (videos, music and photos) over a home wireless network using DLNA technology.

smarTVue cast

### Hitachi smarTVue cast

Enables the duplication of a mobile device screen content onto the Hitachi TV, allowing web access on the big screen with the convenience and speed of the small screen.
