Universal Wipes 200

Simple cleaning
& disinfection,
proven in practice

- ✓ Kills 99.99% of bacteria and viruses*
- ✓ Effective from 10 seconds
- ✓ The UK's number 1 hospital disinfectant wipe brand

Who are Clinell?

Trusted nationwide

Since 2006, Clinell has been at the forefront of infection prevention. Today the Clinell Range has a wide selection of products to help clean and disinfect surfaces, but it all started with the Clinell Universal Wipe. Trusted by 9 out of 10 NHS hospitals, Clinell Universal Wipes have become the go-to infection prevention solution within the healthcare industry.

Clinell Universal Wipes 200 ✓

Clinell Universal Wipes are designed for real-world applications, not just a petri dish. A lot of science goes into each wipe to provide fast and effective results you can trust, killing 99.99% of bacteria and viruses in 30 seconds*.

As our largest wipe pack and featuring a moisture-lock lid, Clinell Universal Wipes 200 are the go-to surface wipe for multi-purpose cleaning and disinfecting.

What about contact time? ✓

Contact time determines how long a disinfectant must remain on a surface to reach its log reduction. Other disinfectants need 2-5 minutes and sometimes even 10 minutes to effectively disinfect a surface. Long contact times aren't practical as the disinfectant must remain wet the entire time.

That's why fast contact times like that of Clinell Universal Wipes deliver an effective clean very quickly, making cleaning and disinfection simple.

Why does efficacy matter? ✓

Many different disinfection products show how effectively they remove microorganisms with a percentage on their packaging. This is called a log reduction. Log reductions are calculated by testing disinfectants against different microorganisms and seeing how well they kill them.

For example, if you put disinfectant in a petri dish with 1,000,000 microorganisms and it leaves 1,000 microorganisms, then that disinfectant would have a 3 log rating: equalling 99.9%. However, Clinell Universal Wipes have a 4 log rating, meaning that out of 1,000,000 microorganisms, only 100 remain, resulting in a 99.99% efficacy rating.

The key to Clinell

Clinell Universal Wipes 200

Clinell Universal Wipes are designed for real-world applications, not just a petri dish. A lot of science goes into each wipe to provide fast and effective results you can trust, killing 99.99% of bacteria and viruses in 30 seconds*.

Kills 99.99% of bacteria and viruses*

From 10 second contact time

Effective against Coronavirus, Norovirus & E.coli

How to use Clinell Universal Wipes

Remove from pack, open out and use flat

Working from top to bottom, clean to dirty, wipe in an 'S' shaped pattern.

Should your wipe dry out or become soiled, replace it with a new wipe. Let the surface air dry to maximise contact time.

Clinell Universal 200
