

# GLOW-IN-THE-DARK

## WORKPLACE FIRST AID KITS

### Would you be able to find your first aid kit in the dark?

The loss of illumination during an emergency can cause panic and confusion, especially if someone is injured and needs assistance. These **GLOW-IN-THE-DARK** kits can help you to locate and identify your first aid equipment quickly in the event of a power failure. Their contents are compliant with the latest British Standard BS85991: 2019, and they reflect the most up-to-date changes in workplace practice, making them demonstrably more 'fit for purpose' in today's environment. The colour-coded safety clips keep the cases tightly shut, creating an airtight, dustproof, and water-resistant environment for the sterile contents. The wall mounting brackets are included so the kits can be placed somewhere easily accessible and highly visible for low light emergencies.
