

12big Thunderbolt™ 3

12-Bay Desktop RAID Storage
Data Sheet

Think Bigger—We've Got You Covered.

With up to 96TB of capacity on your desktop, up to 2600MB/s speeds, and RAID 5/6, the LaCie 12big Thunderbolt 3 lets you rein in the stampede of data from 4/5/6K cameras.

The very fastest I/O.

LaCie harnessed the breakthrough performance potential of the Thunderbolt 3 I/O and squeezed out speeds of up to 2600MB/s—and 1130MB/s in RAID 5—to help slash time off nearly every task in your post-production workflow. Ingest RAW footage from a Blackmagic® cinema camera into Adobe® Premiere® Pro, edit uncompressed HD 10-bit and 12-bit video, and fly through thumbnail and preview rendering on your biggest projects.

For your smartest workspace.

With double the video bandwidth of its predecessor, Thunderbolt 3 lets you daisy chain dual 4K displays or a single 5K display to the LaCie 12big. It's even possible to power a compatible laptop through the Thunderbolt 3 connection.¹

Bigger in every way. Except in footprint.

Get up to 96TB on your desktop—in the same footprint as an iPad Air®. Invest up front in a future-proof, RAID-protected solution to improve data access and security, which can help you save money in the long term.

¹ Delivers up to 45W (port A) or 15W (port B) to power compatible laptops.
