Computer Tower Cart, Rolling Mobile CPU Caddy on Wheels/Casters, Max Load 46.3lb/21kg, Adjustable PC Case Mount, Desktop Floor Stand, Steel Dolly, TAA

Product ID: CPUMOBILESTND

This Rolling Computer Tower Stand provides a secure and mobile stand for a desktop computer. The computer caddy allows for full access to the front and back of a CPU tower and ensures a clear path for optimal airflow. The durable steel construction, combined with protective anti-slip pads, safeguards your CPU chassis from damage, making it a reliable solution for workstation applications.

Adjusting the width of the bracket is easy with the toolless adjustment. Use the wing nuts on the bottom of the base to expand the holder from 4.9 to 8.2 inches (125 to 208mm). This flexibility allows the rolling holder to accommodate various case sizes, including UPS battery backups, providing a custom fit for the installed device.

Maximize your desk space by offloading your desktop computer to the mobile cart. The casters at the base enable effortless positioning wherever needed, and the brakes ensure it stays securely in place. With a maximum weight capacity of 46.3 pounds (21kg), this cart is designed to support equipment while keeping the workspace organized.

Experience hassle-free access to your PC's drive bays, peripheral ports, and cables with the under-desk adjustable mobile caddy. The quick assembly process, requiring only three main components, and the inclusion of all necessary hardware make setup simple and straightforward. This practical design keeps your tech easily accessible.

Certifications, Reports and Compatibility

Applications

• Easily access to ports, cables, or the back of the computer for maintenance or upgrades

• Position under a desk to free up space

Features

• ROLLING CPU CART: This mobile open frame computer stand provides full access to the front and back of the CPU tower while also providing a clear path for airflow; Protective anti-slip pads prevent damage to the CPU chassis; Durable steel construction
