ISTA

International Safe Transit Association

All IOP Branded Toner Cartridges are tested in accordance with ISTA

ISTA Performance Tests result in a Pass/Fail assessment and are used to determine the viability of a packaged product to survive normal shipment.

This test method pretends a drop test according to which a packed item falls from a certain level of height, on the edges of the packaging.

This so called "drop test" ensures the transport security of our laser cartridges.

The benefit:

We develop packaging designs and use the ISTA Standard to ensure IOP branded laser cartridges transport securely so that they arrive at their destination in perfect condition.
