Binding for Home,
Education and Business

www.gbceurope.com

You only get one chance to make a first impression

Give your ideas the competitive edge. Grab your audience's attention and make a great impression with a professionally bound document. With GBC® binding machines and supplies, your reports and proposals will look sharper and more impressive than ever before. Our presentation covers and spines keep materials protected and organised, and they communicate your ideas with a personality that's all its own. You only have a few seconds to make a great first impression, so dress your ideas for success. Whether you're looking for a contemporary feel or something more conservative, we have you covered!

Document Presentation Solutions

How to choose

The type of binding equipment you choose depends very much on your personal/business needs. The following steps need to be taken into consideration:

Step 1

Choose your binding style. GBC offers the following six solutions.

CombBind Systems The Worlds Favourite System	**WireBind Systems** Stylish and Robust
StripBind Systems Simplicity, Security and Speed	**CoilBind Systems** Flexible, Fast and Lightweight
ClickBind Systems Innovative and Editable	**ThermaBind Systems** Integral and Secure

Step 2

Find the right machine for your needs.

- Frequent usage – recommended for use in larger offices and professional services.
- Moderate usage – recommended for use in medium to larger offices.
- Occasional usage – recommended for use in home and small offices.

Find your perfect binding machine using the heading indicators on each page.

HOME   OFFICE   EDUCATION   REPRO

Step 3

Select a presentation cover style. Choose from our ClearView or ProView range to find the very best in presentation appeal. The ProView range features a number of diverse finishes and textures to give a traditional appeal to your document presentation. Ideal as title pages when windows or some form of personalisation are added or as simple colour co-ordinated rear covers when ClearView is used as the title pages. The ClearView range features varying degrees of transparency that are ideal for see-through title pages or as protection against heavy handling or transport.

ClickBind™

The most upscale and easy-to-use spine gets you maximum attention with minimal effort. 34 hole spines zip and unzip with a ClickBind editing tool or by hand so you can add and remove pages anywhere, anytime. Compatible with any ClickBind or WireBind hole pattern.

OFFICE   EDUCATION   REPRO

ProClick Pronto® P3000

The ProClick Pronto P3000 system offers integrated punching capability and automatic binding of the ProClick spine. Easy to use and highly versatile, the P3000 provides professional, high speed binding suitable for a multitude of shared office environments.

- Simple to operate, no training required
- Intuitive LCD interface provides easy to follw instructions as you bind
- Document sizer indicates the correct spine size every time
- Alignment guide ensures precise punch hole location
- Automated for high volume production
- Six second binds up to 450 books per hour
- Pre-loaded ProClick cartridges that hold 20 spines each eliminate the need for loading individual binding spines

4400386	PolyDividers 10 part set with oversized clear covers	Blue, Purple, Pink, Orange, Green

It's not just what you say; it is also how you say it, present it and package it.

In today's increasingly competitive and communicative world, getting your message across has become much more of a challenge. GBC understands this.

Please read our ideas and tips to help you determine what to bind and how to present it.

What to bind

In the office:

- Research results
- Presentations
- Sales tools
- Project information
- Status reports
- Training manuals
- Proposals and tenders
- Contracts and legal documents
- Reference documents
- Business policies

At home:

- Calendars
- Recipe books
- Photo albums
- Diaries
- Writing assignments
- Phone book
- Scrapbooks

In education:

- Teaching guides
- Writing assignments / dissertations
- Emergency / indicident book
- Fire regulations / role call lists
- Phone books

Binding tips

- When you place your document in the punching throat of the machine make sure it is fully in by moving it from side to side, then ensure your document is aligned to the left.

- When using a cover and back, place a sheet of paper in between before punching.

- When using a ClickBind spine, pinch the first two rings together before using the zip tool.

- Make sure all of the pages are aligned before you place the document onto the spine.

- Prior to inserting the binding spine, place the back cover on the front then once bound rotate the back cover to the reverse so that the spine is completely hidden.

Binding Ideas and Tips

Design tips

- Create a background for PowerPoint slides and title page based on your company colours and style. If you would like to use the same template again, create a folder on your computer named template and save it there.

- When grouping text and images, the images should be separate and distinct so the audience knows where to focus.

- Use pictures as bullet points. Go to bullets, then select picture, and import.

- Use up-to-date images with a professional look instead of clip art. Many images are available at no charge on the web.

- Using too many arrows on your slides results in clutter and confusion. Try boxing the information together.

Delivery tips

- Have an opening statement that will encourage audience involvement. Asking questions is one way to do this.

- Let the audience know what's in it for them.

- Use visual aids in moderation; too many overwhelms your message.

- If something goes wrong during your presentation, do not panic. Relax, take a breath and pick up where you left off.

- Watch for filler words such as "um," "like," "you know".

Packaging tips

- Package your presentation to match the occasion.

- 76% of professionals believe a bound presentation gives materials a more professional appearance.

- If in doubt, make your presentation more professional than casual. It's always an advantage if you look polished.

- Packaging with durable materials will add shelf life to your presentation.

- Laminate visual aids to enhance their appearance and give you the ability to display them in the meeting room. And they can be re-used for future presentations.

Content tips

- Understand and know what you are talking about.

- Develop your own story on the topic to connect with your audience.

- Your word choice is often more important than the words themselves.

- Make sure your presentation is clear, focused and interesting.

- What you are saying now is not as critical as what you will say next. Keep your audience eager to hear more.
