

PORTABLE CONFERENCE SPEAKERPHONE

BLUETOOTH/USB/AUX

INCCALLS6

OVERVIEW

HiHo Solutions launches new design Bluetooth/USB 32ft 360° Far-Field Conference Speakerphone series.

It is the best choice for conference room, broadcast live, education, medical treatment and other professional speakerphone far-field scene. Based on Voice IA technology, INNCALL S6 series conference speakerphone adopts Automatic Echo Cancel (AEC), Automatic Noise Suppression (ANS) technology and Automatic Gain Control (AGC) to get 360°10 meters far-field voice pick up, Active Noise Cancel and Echo Cancel functions for achieving high definition tone quality. It can be easily connected to your Bluetooth supported mobile phone or tablet or to your PC with USB or AUX wire. The dynamic equalizer inside could automatically switch between voice and music modes and delivers the best sound quality and EQ depending on what the user is listening to.

It is compatible with multiple devices and operating systems like Windows 7, 8 and 10 as well as Mac OS. It has been tested and optimized for mainstream conference applications like Zoom, Skype, WebEx, Go to Meeting, Google Hangout, Facetime and etc. And it is also personalized with digital assistants like Cortana, Siri, and Google Now. You can simply interact with them via the one-touch smart button.
