Safescan 155-S Automatic counterfeit detector

Never accept counterfeits again

Secure your cash operations and protect your business against counterfeits. In less than half a second the Safescan 155-S checks your banknotes on up to seven security features and verifies them with the highest precision, so even the most sophisticated counterfeits don't stand a chance. Thanks to its uniquely compact design and large display the Safescan 155-S is not only quick and accurate, it can also be used in all sales environments. No matter how small! You can check your banknotes whenever and wherever you need. You can even verify British, Scottish and Northern Ireland pounds mixed together without having to switch between settings. Saving you valuable time and leaving no doubt whether the checked note is real or not.

- Automatic counterfeit detector that rapidly checks and verifies banknotes
- Verifies GBP & EUR in four directions and SCT & NIR in one direction
- Checks and verifies banknotes on up to seven security features
- Is regularly tested by central banks to ensure 100% accurate detection
- Verifies British, Scottish and Northern Ireland pounds mixed together when using the GBP mode
- Displays an error message and sounds an alarm when a suspected banknote is detected
- Free currency updates available to download whenever a new banknote is released
- Adds up the total number and value of the checked notes with the add function
- Shows the total number and value of the verified banknotes
- Easily operated thanks to the clear buttons and large 3.8" LCD display
- Fits in the smallest workspaces thanks to the space saving banknote exit guide
- The banknote exit guide limits its required workspace to only 15.6 centimeters
- In other documentation this model may also be referred to as the Safescan 155-S G2
