The Answer is Clear: Dual Full HD

More Displays — Less Toggling

The MV2 runs up to two Full HD displays [60Hz]*. That's a clear window into everything you need to see when you work across multiple applications, documents, or websites.

*Refer to the Display Resolution Table below for more details on the display capabilities of the MV2, based on the dock ports you and displays you connect to.

*With MacOS only a single monitor is supported in extension mode. Multiple monitors are ONLY supported in mirror mode.

KEEP YOUR LAPTOP CHARGED

Up to 100W Pass Thru Charging

Charge Your Laptop Like You Mean It

A Powerhouse in a Compact Body

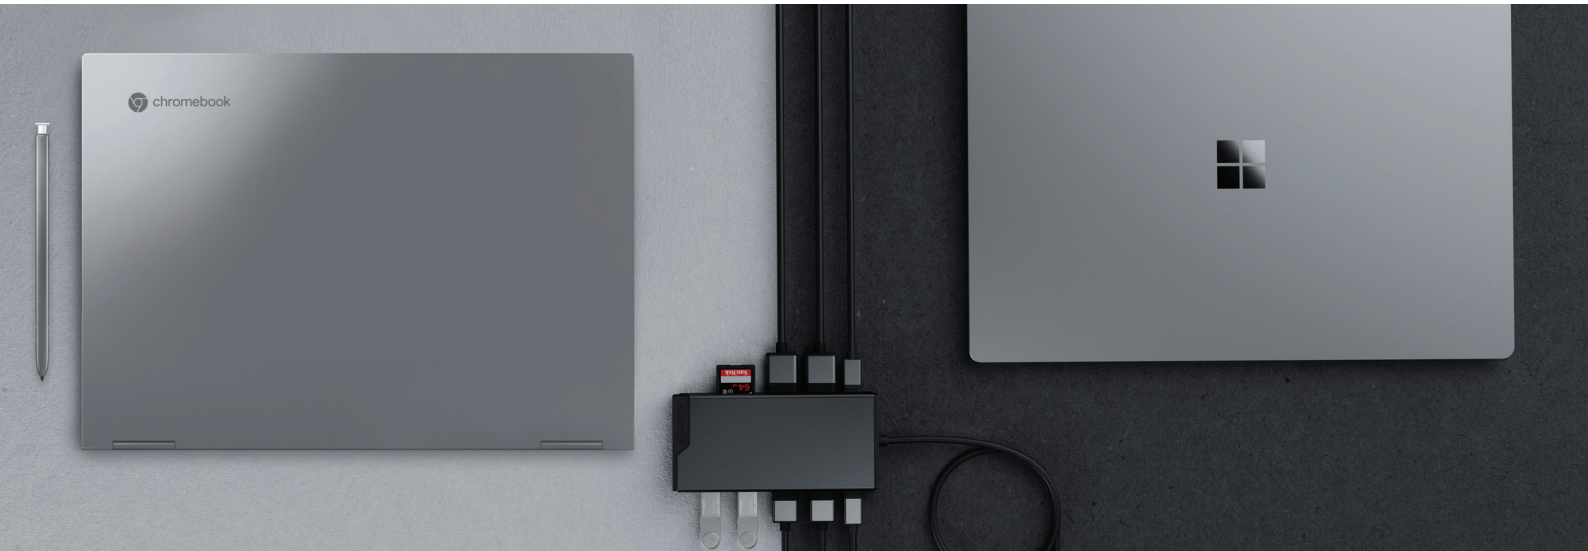

ALOGIC's dock can channel 100W of power [92W into charging your laptop] and transfer data between your devices without delay. With video, audio, and images flowing fast between your devices, and your laptop battery springing back up to full, you can stay on task with minimal disruption.

Great Connections in 12 Ports

Plug into New-Found Productivity

Your work is all about connections. So is the MV2. Connect all your favourite essentials – phone, tablet, keyboard, mouse and the rest – to the ultra-compact dock's five USB ports [USB-A and USB-C]. Enjoy reliable internet in the clutch, with Gigabit Ethernet. Plug in two displays for more screen space, and use the SD Card Reader to stop time squandered on slow video and image transfers.

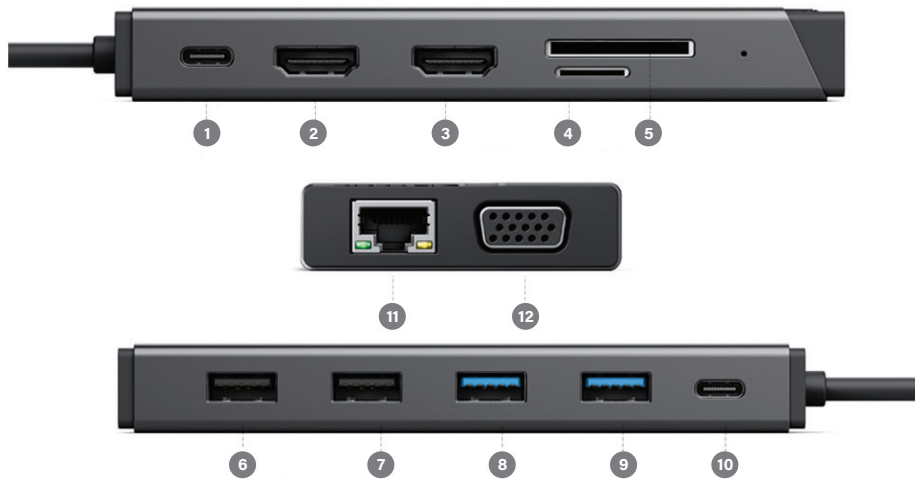

A Dock in Tune With All Modern Laptops

Compatibility Headaches Cured

The MV2 is compatible with all modern laptops. Plug in your Mac, Windows, or Chromebook devices. Hot desk it at home or in the office. When it's time to retire your old laptops, reconnect the MV2 with your new ones. We call that an act of conservation. You could call it an awesome return on investment.

*With MacOS only a single monitor is supported in extension mode. Multiple monitors are ONLY supported in mirror mode.
