

GBC Velocity Lamination Roll Film 80 Micron Gloss

For a lightweight and flexible finish, GBC 80-micron film rolls are an ideal choice for everyday laminating tasks. They are easy-to-load roll films and can laminate up to 120 x A4 sheets, making them perfect for documents such as signs, schedules, and notices—especially those displayed on walls or notice boards and handled infrequently. The lighter-weight film provides effective protection without adding unnecessary rigidity, offering a practical and efficient solution for less frequently used materials.

Attributes

- Film roll length 38.2m for laminating up to 120x A4 sheets.
- Easily laminate signs, schedules, teaching & training aids, banners and more.
- Protect and preserve your documents with a high gloss finish to keep colours bright and bold.
- The 80 micron thickness protects your documents whilst retaining flexibility.
