Smartphone compatible Wi-Fi model

The impressive DM-901 boasts enough functions and features to make it an indispensable business tool. Equipped with Wi-Fi for the first time, it enables to record in a whole new level. While smartphone compatibility allows to remote control your recorder from a distance to achieve clearer recordings, you can link photos taken by smartphone as a visual index to the recording timeline. Furthermore it's made easy to download the recordings from the recorder to a smartphone to instantly share files by sending it to dropbox.

Top quality recordings are guaranteed by the low-noise stereo microphone with 90° outward orientation to capture sound from all directions. The re-designed user interface offers better visibility with colour screen and graphic icons, easier operation with its scroll function, and improved usability with intuitive design.
