

# SECOLOR TREE-FREE FOLDERS

## Sustainable Secolor Tree-Free folders made without trees.

We are used to cardboard being made from trees. But this does not necessarily have to be so. The Secolor Tree-Free folders are produced without using a single tree. The Secolor Tree-Free folder range is made from PaperWise cardboard. This cardboard is entirely made of agricultural waste that would normally be burned in the open air.

### Tree-Free. But how?

80% of agricultural crops, such as the stems and leaves, are burned. This agricultural waste is given a second life. The wood fiber in the Secolor Tree-Free folder is 100% replace by agricultural waste.

(source: LCA calculation by IVAM)

### Reduced eco footprint

The environmental impact associated with the production of this cardboard, as measured from plant to finished product, is lower than FSC® cardboard made from wood fibres and lower than traditional recycled cardboard.

### More income for farmers

In addition to the environmental benefits, we ensure farmers in developing countries receive additional income from selling the agricultural waste.

# SECOLOR TREE-FREE FOLDERS

## Secolor Tree-Free Pocket File

Intended for the loose-leaf filing of documents that cannot be perforated. Packed per 10 pieces.

Art. nr. 3823311
