

20 UV MARKER PEN

INVISIBLY PROTECT YOUR VALUABLE BELONGINGS

Use the Safescan 20 permanent UV pen to quickly and discreetly mark your high-value items such as TVs, tablets and phones. The special ink is invisible under normal lighting conditions; no one can see what you've written until it's placed under UV light. Prove stolen or lost property belongs to you; avoid customer return scams; tag event visitors without leaving a visible mark; even solve clothing mix-ups at work or school. The Safescan 20 UV pen is odourless and colourless and works on most surfaces, including metal, glass, paper, plastic, cloth and skin.

- Ideal for labelling valuables such as TVs, HiFi sets, mobile phones and laptops
- Permanent UV ink
- Ink is visible only under UV light
- Works on most surfaces
- Extra fine tip for easy writing
- Non-toxic ink

Ideal for marking valuable items such as TV's, mobile phones and laptops

Marking lights up under UV light

Extra fine tip for easy writing
