TwinTec... TTB4045

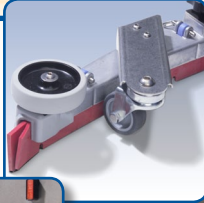

With the TwinTec 4045, every part is designed to combine the very best in functionality and reliability.

The TTB-4045 is a classic example of years of experience in the cleaning market driving the design and specification to ensure full customer satisfaction at all levels from management through to operator. Designed by professionals for professional use in the clear knowledge that clean floors are a fundamental requirement for all cleaning contracts.

The Chassis

The TTB-4045 is based on a full stainless steel chassis coupled to the unique Numatic Structofoam tilting brush deck at the front and the full size aluminium, semi-parabolic, high efficiency, wet pick up floor tool to the rear.

Semi-Parabolic floor tool

Structofoam brush deck

Full stainless steel chassis

DeckLoc tilt mechanism

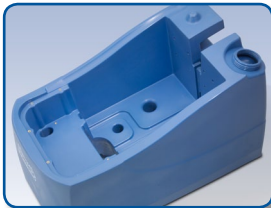

The Tanks

The superstructure comprises 40 litre clean and dirty water heavy duty polyform tanks designed to provide a truly robust structure and equipped with a series of advanced, yet practical, features. All of which are important in ensuring easy and efficient operation.

Large capacity trash basket

Polyform 40 litre dirty water tank

Polyform 40 litre clean water tank

Flexifill 1m easy fill hose

The inside story... Two technologies in one

The original TwinTec concept of providing two primary technologies in a single high performance product is as meaningful today as it always has been...

However, with the passing of time, the technology has been much improved providing enhanced function, performance and results, allowing even higher standards of floorcare to be achieved with substantially increased efficiency. The TTB4045 will be used in 101 different locations and applications and needs to satisfy an equal variety of different operators worldwide. Ease of use and cleaning performance are vitally important and floors need not only to be clean, they need to be seen to be clean.

The Power System

No expense has been spared when selecting the motor modules with the industrial TwinFlo vacuum motor providing the exceptional wet pick up performance whilst the heavy duty geared brush drive ensures floor scrubbing to the highest of standards ...

TwinFlo suction motor

24V drive module

On/Off power control

Nutronic operational control

Master isolator key

Battery Technology

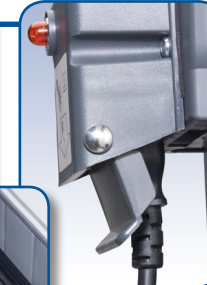

The wonder of 24V cordless floor maintenance is the total freedom of operation and convenience of use.

The TTB-4045 is equipped with 100 Ahr, fully sealed gel batteries, a built in charger system and elapsed time recorder ensuring optimum performance whilst allowing simple management control of both operation and service intervals.

2x Fully sealed gel batteries

Simple plug-in and charge
