## Environmental info

<b>Content</b>	Recycled fibres Chemicals
<b>Material</b>	<p>Recycled fibres Recovered paper can be produced both from collected newsprint, magazines and office waste. The paper is washed with water and treated with chemicals under high temperature and then filtered. Different fibres demand different processes and this determines the end product properties, and makes the fibre type (recovered or virgin) less important.</p> <p>The environmental benefits and economic feasibility of recovered paper as a raw material source depend on its availability, transport distance and the quality of the collected material.</p> <p>Bleaching of fibres Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety. There are different methods used today for bleaching ECF (elementary chlorine free) where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.</p> <p>Chemicals The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view .</p> <p>The used functional chemicals are: Wetstrength agent Dry strength agent Dye Fixing agents Fluorescent whitening agent Glue Softeners</p> <p>The process chemicals are: Antipitch Protection agent Yankee coating Defoamer Dispersing agents and surfactants pH and charge control Retention aids Broke treatment chemicals Drainage aid</p> <p>Packaging Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes Food Contact This product fulfils the legislative requirements for Food Contact materials, confirmed by external certification performed by ISEGA. The product is safe for wiping food contact surfaces and may also come occasionally into contact with foodstuffs for a short period of time</p> <p>Environmental label This product does not have any ecolabel.</p> <p>Date of issue 2013-09-18 Revision date</p> <p>SCA Hygiene Products AB, 405 03 Göteborg, SE</p>
<b>Production</b>	This product is produced in Kostheim mill, DE, certified according to ISO 9001, ISO 14001 and EMAS.
<b>Destruction</b>	This product is mainly used for personal hygiene and can be collected together with household waste.
