

3M™ Laptop/Netbook Privacy Filters

Any idea who's been looking at your screen today?

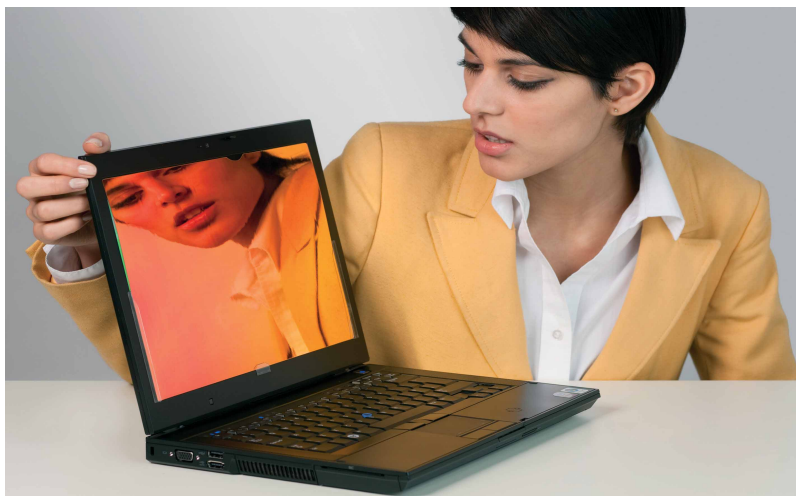

Our research shows there's a four in five chance that someone, somewhere, will be trying to snatch a glance at your laptop or netbook!*

Fit a 3M Black – or new Gold – Privacy Filter and keep your on-screen data strictly confidential.

- Prevents anyone reading your screen when using your computer in public
- Stays in place when laptop is closed
- Easy to remove when sharing data with friends or colleagues
- Helps compliance with Data Protection Act (1998)

3M™ Black filters give full 60° protection from either side. Gold filters protect from above, too!

Go for Gold!

- Nearly twice the effective privacy of standard 3M black filters
- Mirror-like reflective effect provides an obvious privacy warning to onlookers
- Enhanced on-screen clarity for users: 14% higher viewing clarity than 3M black filters
