

Tork Hand Towel Roll for Manual Disp. - 19.5 cm (White)

Article	471141
Roll Length	161.1 m
System	H14
Roll Width	19.5 cm
Roll Diameter	18.5 cm
Core Inner Diameter	4.4 cm
Ply	2
Embossing	Yes
Colour	White

The Manual Dispenser for Tork Hand Towel Rolls provides one-at-a-time dispensing that reduces consumption and improves hygiene. The Advanced rolls have a high capacity which ensures paper availability, and is ideal for busy washrooms like those in schools and airports.

- The long roll reduces maintenance and saves time
- Advanced quality for cost savings and high performance
- Fits in the blue and white 19.5 cm manual dispenser (formerly nextTurn and Tork branded).

Environmental info	
<p>Content Virgin Pulp Recycled fibres Chemicals Material</p> <p>In the tissue process both virgin fibres and recovered paper are being used. In the process it is a matter of finding an efficient solution where both virgin fibres and recovered paper play a role. Different fibres demand different processes and this determines the end product properties, and makes the fibre type (recovered or virgin) less important. The environmental benefits and economic feasibility of recovered paper as a raw material source depend on its availability, transport distance and the quality of the collected material.</p> <p>Bleaching of fibres Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety. There are different methods used today for bleaching ECF (elementary chlorine free) where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.</p> <p>Chemicals The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view .</p> <p>The used functional chemicals are: Wetstrength agent Dry strength agent Dye = if coloured Fixing agents Glue = if used</p> <p>The process chemicals are: Antipitch Protection agent Yankee coating Defoamer Dispersing agents and surfactants pH and charge control Retention aids Broke treatment chemicals Drainage aid</p> <p>Packaging Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes</p> <p>Food contact This product fulfils the legislative requirements for Food Contact materials, confirmed by external certification performed by a third party. The product is safe for wiping food contact surfaces and may also come occasionally into contact with foodstuffs for a short period of time.</p> <p>Environmental label = EU Ecolabel This product is approved for the EU Ecolabel.</p> <p>Date of issue : 2011 Revision date 2014-05-23</p> <p>Production Material produced and converted at Hondouville mill, France, certified according to ISO 9001 : 2008 & ISO 14001 : 2004</p> <p>Destruction HAND TOWEL is mainly used for personal hygiene and can be collected together with household waste.</p>
