# Setup - How to setup our UNO laptop stand

1.   2.   3.

What you need for the installation.

1. Connectors
    The Connectors secure your stand to the laptop.

2. Cleaning wipe
    A wipe to clean the surface where the Connectors will be attached.

3. Laptop stand

1.   2.

Step 1 - prepare the laptop

1. Flip the laptop upside down, keeping the opening edge towards you.

2. Centre the guiding sheet right/left and along the front edge of the laptop, as shown on the left.

Find a clear location (no ventilation, no screws etc) for each Connector evenly spread, as far apart as possible, under the surface marked violet and clean the area with the wipe provided.

For best results, keep the Connectors as far apart as possible.
INFO: DO NOT STICK THE CONNECTORS YET.

1.

Step 2 - apply the connectors

1.Once Connectors prepared, remove the liner from ONE side to uncover the sticky surface and apply it to the clear location on the laptop.

Press down for a few seconds.
INFO: DO NOT REMOVE THE SECOND LINER YET!

1.   2.   3.

Step 3- attach the stand to the laptop

1. Simulate where the stand will be attached by centring the stand along the front edge of the laptop, exactly as shown .

2. Ensure the stand rests on the Connectors and not on the laptop's feet. Once you're confident where the stand will be attached, remove the remaining coloured liners from the Connectors, sticky side facing up.

3. Now align the stand and lower it slowly. Once in place, press down firmly for a few seconds. Leave the stand attached for at least 5 minutes.
