HANDSHAKE Mouse Wireless

Wireless, compact & flexible

The HANDSHAKE Mouse Wireless is a mouse with a vertical grip. It has two buttons and a scroll wheel. Using this mouse correctly reduces muscle tension.

The HANDSHAKE Mouse Wireless is designed for small and medium-sized hands (hand widths up to 9 cm, excluding the thumb).

Thanks to the "handshake" position when using a vertical mouse the wrist doesn't bend sideways too much and the lower arm needs less inward rotation (Schmid et al., 2015). There is less muscle activity in the lower arm than when using a standard mouse (Quemelo & Vieira, 2013).
