

CV 30/1

Kärcher's CV 30/1 upright vacuum cleaner uses a single high-performance motor to drive both the suction fan and brush, keeping the machine lightweight, easy to carry and manoeuvre.

1 Manual brush roller adjustment

■ Thanks to the height adjustment, the roller brush can be adjusted to any carpet pile height.

3 Quick-change system for power cable

Time- and cost-saving replacement of power cable without any prior knowledge.

2 Brush replacement without tools

Rapid change of roller brush without the need for any tools.

4 Patented centrifugal coupling

For a longer service life: the innovative, patented centrifugal coupling protects the entire brush head against overload thus avoiding high service costs.
